

**TITLE**

Electrical Engineer

QUALIFICATIONS

US Citizen – due to government contract requirements

Baccalaureate degree in a related field

Excellent problem solving; presentation, written and oral communication skills

Computer Skills: Intermediate level or higher : Word, Excel, Powerpoint, Outlook

Requirements

Must possess a minimum of a BS in Electrical Engineering with minimum of 5 years of design experience, including components and/or subsystems design and manufacturing. Must be a solid team player with good organizational skills. Product development in an aerospace environment strongly preferred. Must be able to maintain up to date project schedules, be fluent in MS Office programs, and must be able to compile formal reports and have good technical presentation skills in front of a diverse audience. The ideal candidate will possess a broad skill-set in electrical engineering and must be technically strong in one or more of the following areas: embedded microprocessor control, PCB layout, analog design and power electronics, C/C++ for real time control. A strong preference will be given for experience in DFM/A, Six-Sigma, and lean manufacturing. Experience with PC based data acquisition testing systems and/or LabView is a plus.
